Backgrounds Gelliplate:

When Gelliprinting both the stencils and the stamps can be used to pick up ink from the print plate and make a print. Play with the possibilities and make many prints on (printing) paper using Talens Amsterdam paint. The background of rather plain prints can be enhanced with stencils/stamps and paint/ink.

Butterflies:

These stamps can be used in many ways.

- Use the bold butterfly to pick up ink from the Gelliplate and make a print.
- Stamp the bold butterfly in colour and on top an outline in black. Using the Stamp Master will be very handy. Slightly overlapping is no problem, it creates a special, pretty effect.
- Stamp only the outline and colour in using water colour markers, copics, coloured pencils or markers.
