Cut out this set, place it face up onto another sheet of pearly white card and draw around the outline again. Cut out. Draw one more champagne glass and cut out, it will be used as a 3D glass in front of the rest when finishing the card. Take the set for the back of the card, score a fold at 9.5 cm down from the top and fold this part over. Use it to adhere both sets together. The card can now stand up straight. For decoration purposes use the inner lines of the stencil. Draw around them at the back of card/design paper. Attention: turn the stencil over, so that you do not end up with a mirror image. Adhere the cut-out parts to the card and adhere the separate glass with 3D-tape. Write a text and draw lines with a black fine liner onto the label. Glue will be visible through vellum, so only apply it where the vellum will be covered or use small dots along the edges. Die cut the circle, numbers, star, pins, label and plate with cutlery. Stamp a text onto the circle and tie a bow of wax cord through the label and around the bottle. Complete the card as per example given.
