Materials used for both cards:

Craftables: CR1331 (Basic shapes-Circles), CR1408 (Card stand), CR1478 (Poinsettia by Marleen), Creatables: LR0493 (Horizon-Snowy Mountains), LR0494 (Horizon-Amsterdam), LR0495 (Santa is coming), LR0677 (Circle lay-out set), Die cut and embossing machine, Text stamps: CS1067 (Handgeschreven-Kerst), Stamp master advanced: LR0029, Stamping ink: Versafine onyx black, Distress ink: faded jeans, Papicolor card: night blue (941), Velvet card: white 200 gr, Blending tools, Brad, Piercing tool or needle

Tip to quickly find the centre of a circle:

Die cut the largest circle of the circle lay-out set (LR0677) from thin paper. Fold the circle in half and in half again. Cut off a very tiny piece of the folded corner.

Unfold the circle, place it on card/design paper and mark the centre with a pencil.

General instruction revolving card:

After the three circles have been fixed together with a brad, the largest circle can be turned, showing at the top either a text or Santa with his reindeer.

Extra needed for card 1:

Clear stamps Art: MM1630 (Hello Fall), MM1631 (Hallo Herfst), Distress ink: chipped sapphire, Distress oxide ink: faded jeans, Papicolor card: blue (955), Decoration paper: CA3104 (snow paper), CA3126 (gold-A5), Gesso: white, Glitter glue: stardust (Stickles), Marker: Pen-touch white + clear block, Piercing tool or needle

Die cut the largest circle of LR0677 from white velvet card and blue and night blue card.

Pierce a hole in the centre (see Tip) big enough for the brad.

Night blue circle: die cut the horizon Amsterdam just a bit higher than the centre. The hole for the brad should be exactly between two houses. Then place the horizon Amsterdam onto gold-coloured paper, trace the outline of the houses and cut out a bit smaller. Adhere behind the windows.

Die cut the poinsettia 3x from snow paper and the hearts and leaves from gold-coloured paper.

Blue circle: die cut the snowy mountains. Make sure the mountains are visible behind the houses. Work the mountains with gesso and glitter glue.

Adhere the blue circles together, with the holes exactly on top of each other.

White circle: work one half with the blending tool and distress ink faded jeans and the other half with chipped sapphire. Stamp the ice crystals with distress oxide ink faded jeans along the border of the circle randomly.

Tap the clear block against the white marker to make splashes, creating a starry night.

Die cut Santa and his reindeer 2x from gold-coloured paper and position them onto two opposite borders.

Stamp two different texts onto the border between the two Santas.

Completing the card: fix the three circles with a brad.

Die cut the one but smallest circle of CR1331 from white velvet card and adhere at the back, covering the folded pins of the brad. Die cut a blue card stand.

Extra needed for card 2:

Craftables: CR1335 (Punch die-Snowflakes), Pretty Papers design paper pad: PK9172 (Frozen Winter-A4), Decoration paper: CA3127 (silver-A5), Soft glitter paper: CA3142 (silver-A4), Glitter: Viva eiskristall

Die cut the largest circle of LR0677 twice from white velvet card, once from night blue card and once from blue design paper with dots. Determine the centre of the four circles (see Tip) and use a piercing tool to make a hole in the centre, big enough for the brad.

Night blue circle: die cut a semi-circle from blue-white design paper and cut off a narrow strip from the straight line. Adhere to the night blue circle. Then die cut the horizon Amsterdam, just a bit higher than the centre. The hole for the brad should be exactly between two houses.

First white circle: die cut the snowy mountains, making sure the mountains will be visible behind the houses.

Second white circle and dotted one: adhere the circle of blue design paper with dots and work with faded jeans ink and a blending tool.

Stamp the text with Versafine ink onto one half of the circle.

Die cut Santa from silver-coloured paper and adhere to the other half. Die cut the ice crystals from silver-coloured soft glitter paper and adhere. Fix a brad through all circles.

Die cut the poinsettias from white velvet card and the leaves and heart of the flowers from night blue card. Position on the card front as per example. Apply glue to the flowers, sprinkle glitter on top and remove the loose glitter.

Die cut the one but smallest circle of CR1331 from white velvet card and adhere at the back, covering the folded pins of the brad. Die cut a white card stand.

Draw the window with shutters onto kraft card along the **second line**. Cut out, the hearts too. The window remains closed, it is the back of the card.

Draw the **third line** onto white card. Draw the hearts in the shutters and the four parts in the window. Cut out.

Draw the **fourth line** onto design paper, the hearts and the window parts too. Cut out.

Draw the window without the shutters onto design paper to create wallpaper, cut out and adhere to the kraft card

There is a Christmas tree in the room.

Draw only the top three parts of the Christmas tree (PS8046) onto white card. Use the outer lines of the stencil. Use the inner lines to draw the three parts onto green design paper. Cut out and assemble the tree.

Cut baubles from design paper, hang them in the tree, together with a die-cut bow. Place the tree in the centre of the card.

Draw the planter (PS8077) onto kraft card, cut out and score the lines. Draw the front onto design paper too and cut out. Work the edges with gesso and adhere.

Work the other parts cut from design paper, with gesso too.

Adhere the window of design paper onto the white window. Cut mica to size and layer behind.

Adhere two pieces of lace to the window. Place the window with foam tape on the card.

Die cut and stamp two red poinsettias and five green leaves, work with gesso and assemble.

Die cut and stamp the hellebores from white velvet card, the hearts from green and assemble.

Materials used for all pages:

Marjoleine's BuJo stamps: MZ1907 (Maanden en Feest), MZ1908 (Dagen en Planning), MZ1909 (Tracker symbols), Stamping ink: Archival jet black, Ecoline pens: dark (506), yellow ochre (227), bronze green (657), Staedtler pigment liner: 0.3, 0.5 and 0.7, Bullet journal, Water brush

Extra needed for these pages:

Marjoleine's Grid Cheat sheet: LR0030

Place the grid cheat sheet onto the bullet journaling page. If there are dots on the page, place the grid with its holes on the dots. A blank page without dots can be used too, of course. Mark the corner points (and a few extra if you like) of each section with a pencil. Use the grid for guidance. Remove the grid and stamp the images. Draw all lines of the sections with a waterproof pen. Erase pencil lines before colouring in the images. Apply a little ink to a piece of plastic, add a droplet of water. Mix and use this ink to colour in the images. Make splashes by loading enough ink onto the brush and tap on it.

Extra needed for this page:

Marjoleine's Circle Tracker tool: LR0037

Use a pencil and the circle tracker tool to draw the sections of the circle tracker. You can choose any number of sections. For this page 32 were chosen. Draw one half, turn the tool, and draw the other half. Ink over the lines of the circles with a waterproof pen. Turn the tool after one half is done. Then ink over the pencil lines of the sections with a waterproof pen. Firstly, write all numbers with a pencil around the circumference of the circle. Then stamp the numbers. Because the numbers have already been written in pencil, you can start stamping all 1's and all 2's, etc. Decorate the page with stamps. Erase pencil lines before colouring in the images. Apply a little ink to a piece of plastic, add a droplet of water. Mix and use this ink to colour in the images. Make splashes by loading enough ink on the brush and tap on it.
