

Benodigdheden

- Creatable LRO218
- Navy blue and silver card stock
- Glue, 3 cotton swabs
- Silver acrylic paint (or glimmer mist, ink pad), brush
- pearls, silver confetti or any other bling
- gauze (about 24x10cm)

Method

- 1 First paint your piece of gauze silver on a copy paper so it will have time to dry while you will be doing other bits. You can also use a glimmer mist or an ink pad to color the gauze.
- 2 Cut out 4 silver and 2 navy blue prams. Emboss only 1 navy blue pram with the die. To create a mirrored embossed pram for the other side, place the second cut out navy pram on the outside of the die and emboss the details by hand.
- 3 To enhance parts of the pram we use the silver cut outs of LRO218. Cut a handle and wheels out of all 4 of the silver prams. And tops out of 2 of them. Leave the rest because you will need it later. Glue the silver wheels on both sides of the blue prams, two on each cut out. To make a bottom of the pram cut out a piece of 4,5 x 9 cm blue cardstock. Score it 0,5 cm from both long sides and make cuts every 0,5 cm. You need to cut away 1,5 cm of the paper and save this piece for later. Now it's time to assemble the pram with the two blue sides and the blue bottom.
- 4 For the cover of the pram take the remaining part of a navy strip that you cut away and cut 3 stripes about 0,5 cm wide. Than glue them to the cover between the two sides. Cut the painted gauze into 4 stripes of 3,5 cm wide, two long and two short strips. Use one long strip for the cover of the pram. Glue the small strips on both sides to stick the gauze to and fold the gauze over the top and to the inside of the top.
- 5 Put glue on the inside of the pram and line it with a second longer strip of the gauze. For the outsides of the top of the pram use the shorter folded pieces of gauze and cut off the leftovers. Use the silver cut outs of the top of the pram on the outside to finish the cover off. Of the leftover silver pieces cut out the bottom of the pram to finish off the inside of the pram. To make a handle and axles you need to take the 3 cotton swabs and cut them 3,5 cm long. Glue them in place. You can decorate the pram further while the glue of the handle and axles is drying. When the glue is completely dry you can paint the plastic handle and axles with a silver paint, and your cute pram is done!
